

Module 15

Monetization & Publishing — Tier 3: Advanced

1. Publishing Your Designs

- Platforms like MakerWorld and Printables let you upload designs for others to print
- Good listings include clear photos, tested print settings, and a helpful description

2. Monetization Paths

- Platform reward programs (e.g. MakerWorld's maker rewards for popular designs)
- Selling designs directly (paid model files)
- Selling physical printed products (Etsy, marketplaces)
- Commission work — custom designs for clients

3. Licensing Basics

- Understand the license before uploading — Creative Commons variants control whether others can sell prints of your design
- If using someone else's design commercially, always check their license terms first

4. Building a Portfolio

Consistent publishing, clear branding (like your course platform's identity), and engaging with community feedback all build long-term credibility and visibility.

End of Module 15 — End of Tier 3. Curriculum complete.
